9999

University 2

MBA, Strategic Management

Awards

FEB 2019

Competition 1

First place

Improper food storage is the most commonly violated health code in the restaurant. We invented a machine learning solution that detects if raw chicken has been stored above any other food item.

MAR 2019

Competition 2

Second place

Created a business solution that counts and keeps tracks restaurant inventory.

APR 2019

Competition 3

Best retail solution

Developed an image recognition app that prints labels with the name, time, and date to track of freshness of foods.
